

JIM CRUICKSHANK is excited to join the Remick Country Doctor Museum & Farm team as their new program manager. Jim grew up on a family farm in Iowa, where helping to raise Polled Hereford cattle instilled in him a love of small farms and rural life. He holds a Bachelor of Arts degree in history from Central College and a Master of Science in park and resource management from Slippery Rock University. Always an avid learner, Jim is currently completing a Bachelor of Science in environmental science with a concentration in geospatial technology from Southern New Hampshire University and is a Certified Interpretive Guide through the National Association of Interpretation.

Developing place-based outdoor education programming is a passion for Jim, and he is very excited for the opportunity to build and deliver site specific programming that engages learners of all ages. On his path to Remick, Jim has taught for a variety of wonderful outdoor education centers and public schools from as far as Texas and Indiana, to right here in New Hampshire. He has also provided professional development programs for schools and teachers, and presented at conferences for the Association for Experiential Education and the New Hampshire Environmental Educators.

New Hampshire is certainly now home for Jim, and his passion for conservation is evident during his free time.

When he isn't at the museum, you can find him hiking, bird watching, identifying trees and insects, rock climbing, or skiing. Jim also enjoys reading, exploring the coast, and playing board games with friends.
